EDUCATION

Vellore Institute of Technology

2022 – 2026

B.Tech in Computer Science & Engineering (Specialization in E-Commerce Technology)

- Relevant coursework : Database Management System (MySQL) , Python , Data Analytics , Data Visualization , Software Engineering , Power BI , Data Science.

TECHNICAL SKILLS

Languages: Python, SQL, HTML, CSS

Analytics & Data: SQL (complex queries, joins, subqueries, window functions), Pandas, NumPy, EDA, Data Cleaning, ETL Pipeline Design, Data Mining, Insight Generation, Automation

Visualization: Matplotlib, Seaborn; familiar with Power BI, Tableau, Metabase

Databases: MySQL, CSV, JSON

ML / AI: Scikit-learn, TensorFlow, PyTorch, RAG, Neural Networks, Deep Learning

Tools: Flask, Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Google Sheets, MS Excel

PROJECTS

Retail Sales Data Engineering & Analytics Pipeline | Python · Pandas · MySQL · SQL · ETL

- Built an end-to-end ETL pipeline: extracted raw retail CSV data, performed data cleaning in Pandas (null handling, deduplication, type normalization), & loaded into MySQL - processing **50,000+ records** with a **15% pre-load error catch rate**.
- Wrote **15+ complex SQL queries** (multi-table joins, subqueries, window functions, GROUP BY) to surface business insights: revenue trends, top-performing products, and month-over-month growth.
- Automated recurring pipeline execution via Python scripting, reducing manual reporting effort by **~70%** and ensuring consistent, timely data delivery to stakeholders.
- Validated data quality at each pipeline stage by flagging anomalies before they reached reporting layer, improving downstream data reliability.

CourseMind — RAG-Powered AI Teaching Assistant | Python · Whisper · RAG · JSON

- Orchestrated a complete data ingestion pipeline: extracted audio from **50+ lecture videos**, transcribed via Whisper, chunked with metadata, and stored in structured JSON — cutting user query wait time by **30%**.
- Engineered multilingual text cleaning, deduplication, and normalization workflows, applying production-grade data preprocessing principles to unstructured content at scale.
- Developed a semantic search retrieval layer for context-aware answer generation, demonstrating applied data retrieval and insight delivery from structured datasets.

Sales CRM & Analytics Dashboard System | Python · Flask · SQL · Chart.js

- Created a CRM-based sales system managing 1000+ leads with pipeline tracking (Lead→Qualified→Closed), improving sales workflow visibility by **~40%**
- Designed relation database in MySQL, developed 10+ SQL queries for sales insights & automated reporting workflows using Python—reducing manual effort by **~60%** & supporting digital transformation initiatives.

CERTIFICATIONS

- **AWS Certified Data Engineer – Associate** *Amazon Web Services*
- **Data Analytics Virtual Job Simulation** *Deloitte*
- **MERN Full Stack Certification** *ETHNUS*
- **Blockchain Developer Certification** *IBM*
- **PwSkills × Microsoft: Basics of Data Analytics** *PwSkills / Microsoft*

RELEVANT COURSEWORK & CONCEPTS

Data Science Lifecycle • Exploratory Data Analysis (EDA) • Statistical Analysis • Probability • SQL Query Optimization • Relational Database Design • ETL Pipelines • Data Cleaning • Data Visualization • Machine Learning • Neural Networks • Supervised & Unsupervised Learning • Model Evaluation (Accuracy, RMSE, F1-Score, ROC-AUC) • Cross-Validation • Feature Engineering • RESTful APIs • Version Control (Git) • Object-Oriented Programming • Agile Development
